

What is claimed is:

SUB A1
1. An oligomeric compound conjugated to a ligand that interacts with a protein.

5 2. The oligomeric compound of claim 1 wherein said ligand binds to said protein.

3. The oligomeric compound of claim 1 wherein said ligand is a drug moiety.

4. The oligomeric compound of claim 3 wherein said
10 drug moiety is, warfarin, phenylbutazone, ibuprofen, suprofen, fenbufen, ketoprofen, (S)-(+)-pranoprofen, carprofen, naproxen, dansylsarcosine, 2,3,5-triiodobenzoic acid, flufenamic acid, folinic acid, mycophenolic acid, a benzothiadiazide, chlorothiazide, a diazepam, indomethacin,
15 a barbiturate, a cephalosporin, a sulfa drug, an antidiabetic, an antibacterial or an antibiotic.

SUB A2
20 5. The oligomeric compound of claim 3 wherein said drug moiety is aspirin, phenylbutazone, ibuprofen, suprofen, fenbufen, ketoprofen, (S)-(+)-pranoprofen, palmityl or carprofen.

6. The oligomeric compound of claim 3 wherein said drug moiety is ibuprofen.

7. The oligomeric compound of claim 1 wherein said protein is a cellular, serum or vascular protein.

25 8. The oligomeric compound of claim 7 wherein said protein is a serum protein.

9. The oligomeric compound of claim 8 having a K_d lower than 20 μ M with at least one serum protein.

10. The oligomeric compound of claim 8 wherein said serum protein is albumin, an immunoglobulin, α -2-5 macroglobulin, α -1-glycoprotein or a lipoprotein.

SUB
A3
11. The oligomeric compound of claim 1 further including a linking group attaching said ligand to said oligomeric compound.

12. The oligomeric compound of claim 11 wherein said linking group is 6-aminohexyloxy.

SUB
A4
13. The oligomeric compound of claim 1 wherein said compound is an oligonucleotide comprising a plurality of nucleosides connected by covalent internucleoside linkages.

14. The oligomeric compound of claim 13 wherein said linkages are phosphodiester linkages.

15. The oligomeric compound of claim 13 wherein said linkages are phosphorothioate linkages.

16. The oligomeric compound of claim 13 wherein said linkages are non-phosphorus containing linkages.

20 17. The oligomeric compound of claim 13 wherein at least one of said nucleosides bears a 2'-substituent group.

18. The oligomeric compound of claim 17 wherein said 2'-substituent group is O-alkylalkoxy.

19. The oligomeric compound of claim 18 wherein said

2'-substituent group is methoxyethoxy.

20. The oligomeric compound of claim 3 wherein said drug moiety is an arylpropionic acid.

21. The oligomeric compound of claim 20 wherein said arylpropionic acid has the formula:

wherein:

- one of R_1 and R_2 is C_1 to C_{12} alkyl and the other of R_1 and R_2 is aryl; or
- 10 both R_1 and R_2 are C_1 to C_{12} alkyl; or
- both R_1 and R_2 are aryl.

22. The oligomeric compound of claim 21 wherein said arylpropionic acid is chiral.

23. The oligomeric compound of claim 22 wherein said 15 chiral arylpropionic acid has the *S* configuration.

24. The oligomeric compound of claim 22 wherein said chiral arylpropionic acid has the *R* configuration.

25. The oligomeric compound of claim 21 wherein said aryl groups are substituted or unsubstituted benzyl, phenyl, 20 xylyl, naphthyl, toluyl, pyrenyl, anthracyl, phenanthryl, azulyl, phenethyl, cinnamyl, benzhydryl, and mesityl in said substituents are hydroxyl, alkyl, alkoxy, alcohol, benzyl, phenyl, nitro, thiol, thioalkoxy, halogen, or alkyl, substituted alkyl, aryl, alkenyl, or alkynyl groups.

SUB
A6

26. A method of increasing the concentration of an oligonucleotide in serum comprising the steps of:

- (a) selecting a drug moiety that is known to bind to a serum protein;
- 5 (b) conjugating said drug moiety to said oligonucleotide to form a conjugated oligonucleotide; and
- (c) adding said conjugated oligonucleotide to said serum.

27. The method of claim 26 wherein said serum protein
10 is albumin, an immunoglobulin, α -2-macroglobulin, α -1-glycoprotein or a lipoprotein.

28. The method of claim 26 wherein said serum protein is albumin.

SUB
A7

29. The method of claim 26 wherein said drug moiety is
15 aspirin, warfarin, phenylbutazone, ibuprofen, suprofen, fenbufen, ketoprofen, (S)-(+)-pranoprofen, carprofen, naproxen, dansylsarcosine, 2,3,5-triiodobenzoic acid, flufenamic acid, folinic acid, mycophenolic acid, a benzothiadiazide, chlorothiazide, a diazepam, indomethacin,
20 a barbiturate, a cephalosporin, a sulfa drug, an antidiabetic, an antibacterial or an antibiotic.

30. The method of claim 26 wherein said drug moiety is aspirin, phenylbutazone, ibuprofen, suprofen, fenbufen,
25 ketoprofen, (S)-(+)-pranoprofen, palmityl or carprofen.

SUB
A8

31. The method claim 26 wherein said drug moiety is ibuprofen.

32. The method of claim 31 wherein said protein is albumin.

33. The oligomeric compound of claim 26 wherein said drug moiety is an arylpropionic acid.

SUB
A

34. The oligomeric compound of claim 33 wherein said arylpropionic acid has the formula:

5

wherein:

one of R_1 and R_2 is C_1 to C_{12} alkyl and the other of R_1 and R_2 is aryl; or

both R_1 and R_2 are C_1 to C_{12} alkyl; or

10 both R_1 and R_2 are aryl.

35. The oligomeric compound of claim 34 wherein said arylpropionic acid is chiral.

36. The oligomeric compound of claim 35 wherein said chiral arylpropionic acid has the *S* configuration.

15 37. The oligomeric compound of claim 35 wherein said chiral arylpropionic acid has the *R* configuration.

SUB
B3

20 38. The oligomeric compound of claim 34 wherein said aryl groups are substituted or unsubstituted benzyl, phenyl, xylyl, naphthyl, toluy, pyrenyl, anthracyl, phenanthryl, azulyl, phenethyl, cinnamyl, benzhydryl, and mesityl wherein said substituents are hydroxyl, alkyl, alkoxy, alcohol, benzyl, phenyl, nitro, thiol, thioalkoxy, halogen, or alkyl, substituted alkyl, aryl, alkenyl, or alkynyl groups.

SUB
A10

25 39. A method of increasing the capacity of serum for an oligonucleotide comprising the steps of:

(a) selecting a drug moiety that is known to bind to a serum protein;

(b) conjugating said drug moiety to said oligonucleotide to form a conjugated oligonucleotide; and

(c) adding said conjugated oligonucleotide to said serum.

40. The method of claim 39 wherein said serum protein is a protein having a binding site for said drug moiety.

41. The method of claim 39 wherein said serum protein is a protein having a binding site for said oligonucleotide.

42. The method of claim 39 wherein said serum protein is a protein having a binding site for said oligonucleotide and a binding site for said drug moiety; wherein said binding site for said oligonucleotide is distinct from said binding site for said drug moiety.

43. A method of increasing the binding of an oligonucleotide to a portion of the vascular system comprising the steps of:

(a) selecting a drug moiety that is known to bind to a protein that resides, in part, in the circulating serum and in part in a non-circulating portion of the vascular system;

(b) conjugating said drug moiety to said oligonucleotide to form a conjugated oligonucleotide; and

(c) adding said conjugated oligonucleotide to said vascular system.

44. The method of claim 43 wherein said drug moiety is aspirin, warfarin, phenylbutazone, ibuprofen, suprofen, fenbufen, ketoprofen, (S)-(+)-pranoprofen, carprofen, naproxen, dansylsarcosine, 2,3,5-triiodobenzoic acid,

SUB
A11

flufenamic acid, folinic acid, mycophenolic acid, a benzothiadiazide, chlorothiazide, a diazepine, indomethacin, a barbiturate, a cephalosporin, a sulfa drug, an antidiabetic, an antibacterial or an antibiotic.

5 45. The method of claim 43 wherein said drug moiety is aspirin, phenylbutazone, ibuprofen, suprofen, fenbufen, ketoprofen, (S)-(+)-pranoprofen, palmityl or carprofen.

SUB
A12

46. The method claim 43 wherein said drug moiety is ibuprofen.

10 47. The oligomeric compound of claim 43 wherein said drug moiety is an arylpropionic acid.

SUB
A13

48. The oligomeric compound of claim 47 wherein said arylpropionic acid has the formula:

15 wherein:

one of R_1 and R_2 is C_1 to C_{12} alkyl and the other of R_1 and R_2 is aryl; or
both R_1 and R_2 are C_1 to C_{12} alkyl; or
both R_1 and R_2 are aryl.

20 49. The oligomeric compound of claim 48 wherein said arylpropionic acid is chiral.

50. The oligomeric compound of claim 49 wherein said chiral arylpropionic acid has the S configuration.

SUB
B4

51. The oligomeric compound of claim 49 wherein said

chiral arylpropionic acid has the *R* configuration.

52. The oligomeric compound of claim 48 wherein said aryl groups are substituted or unsubstituted benzyl, phenyl, xylyl, naphthyl, toluyl, pyrenyl, anthracyl, phenanthryl, azulyl, phenethyl, cinnamyl, benzhydryl, and mesityl wherein said substituents are hydroxyl, alkyl, alkoxy, alcohol, benzyl, phenyl, nitro, thiol, thioalkoxy, halogen, or alkyl, substituted alkyl, aryl, alkenyl, or alkynyl groups.

53. A method of promoting cellular uptake of an oligonucleotide in a cell comprising the steps of:

- (a) selecting a protein that resides on the cellular membrane and extends, at least in part, on the external side of said membrane;
- (b) selecting a drug moiety that is known to bind to said protein;
- (c) conjugating said drug moiety to said oligonucleotide to form a conjugated oligonucleotide; and
- (d) exposing said cell to said conjugated oligonucleotide.

54. The method of claim 35 wherein said protein is a cell surface integrin.
